### About

I'm a highly skilled and experienced software engineer coming up on 10 years of industry experience. I've worked with a diverse range of companies, from small digital agencies to big companies with 3000+ employees.

I have a strong passion for creating innovative and user-friendly websites that deliver exceptional user experiences.

I have a solid foundation in front-end and back-end development, I am proficient in various programming languages, frameworks, and tools.

## Experience

- June 2023 – Current 🌐 Remote  
 Senior Frontend Developer  
**Dealer Tire**
  - Identified web performance issues and implemented best practices to decrease page load speed by ~79%; 17.5 seconds to 3.66 seconds.
  - Fixed expensive server side data fetching which contributed to page load speeds and user experience.
  - Worked with team to migrate the email order confirmation system to SendGrid API.
  - Working with team to update app to Vue 3 and Nuxt JS.
- Feb. 2022 – May 2023 🌐 Remote  
 Senior Software Engineer  
**Alto**
  - Led the Internal Tools team to reduce client support tickets, improved upon and built new workflows. (Laravel, Vue.js, MySQL)
  - Reduced client support tickets by approximately 50% per month in Q3 of 2022.
  - Improved workflows by automation. Example: Automate charging fees which resulted in saving the client support team 1 hour of work per day. Neglecting this improvement at high volume would have become unscalable for the company. (Laravel, Vue.js, Stripe API)
  - Trained and mentored junior engineer. Including extensive training in the monolith repository and pair programming the implementation of new features.a nostrum et beatae. Maiores repudiandae quibusdam autem enim ut in possimus ad.
- Nov. 2021 – May 2022 🌐 South Carolina  
 Developer / Designer / Manager  
**Freelance**
  - Worked with a diverse set of organizations including: a startup, a large manufacturing facility and a church.
  - Designed, developed and managed web development projects.
  - Communicated status updates in a timely manner through email, phone calls and in-person meetings.
  - Primarily used React and Next JS
- Nov. 2017 – Feb. 2022 🌐 South Carolina  
 Senior Frontend Developer, Frontend Developer  
**Red Ventures**
  - Led frontend team planning, developing and deploying a new health education product using Next.js/React. This resulted in acquiring 12,000+ new users in the first 2 months. (React, Tailwind CSS, Next.js, RESTful API)
  - Led frontend A/B testing team by developing new assets on Healthline articles. This resulted in approximately \$25,000/month increase in revenue. (Javascript, HTML, Webpack, Node.js)
  - Worked on a team that engineered an online scheduling tool for a major healthcare provider in the Carolina's. The tool grew revenue an additional \$10 million/year. (Vue.js, Vuex, RESTful API)
  - Oversee the entire lifecycle of our features – including component design, implementation and roll-out.
  - Created a new workflow for generating static landing pages for the business team. (React, Next.js)
  - Implemented CI/CD workflow with CircleCI to eliminate manual deployments. This resulted in more reliable deployments.
  - Mentor junior engineers and onboard new engineers to my team.
  - Created an internal tool for clients to capture bugs on their websites. Resulted in helping team become more efficient and organized. (Vue.js, Firebase)
  - Contributed in the creation of component/styles library for the consumer facing websites.
  - Retrieved data from MySQL using PHP to populate relevant content for each page.
- May 2016 – Nov. 2017 🌐 North Carolina  
 Frontend Developer  
**Carbonhouse**
  - Built the website for Carbonhouse, a company that provides software solutions for the construction industry.
  - Created a mobile responsive design for the website.
  - Integrated the website with the company's existing database system.
  - Developed custom components for the website, including a search function and a user profile system.
  - Collaborated with the company's marketing team to ensure the website effectively communicated their message.

## Latest project

### Born Again App

A personal project that allows for compiling and sharing Christian resources that have helped people grow in their faith. Users have the ability to save books, podcasts, sermons, etc. to their profile, following others and discover new resources.

Built with Laravel, Vue and MySQL
